Topics of Interest

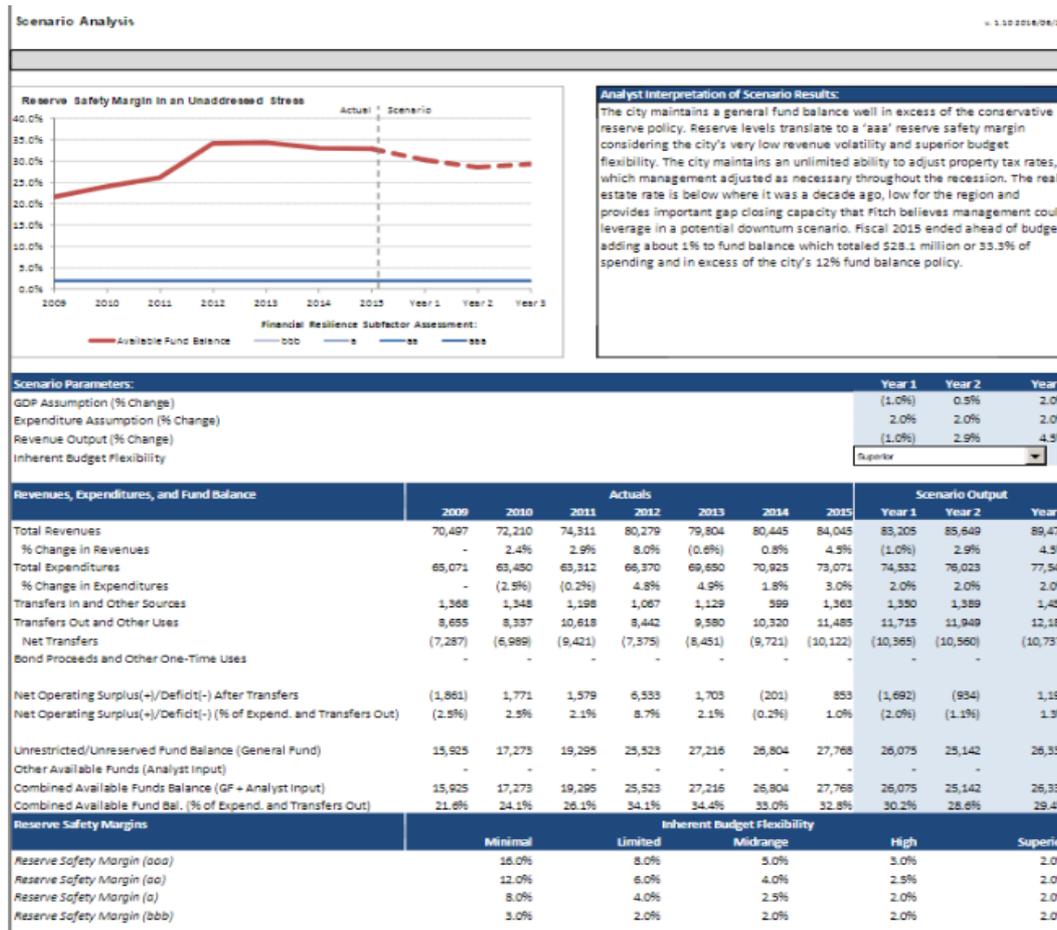

| | | |
|---|--|----|
| 1 | Revised U.S. Tax-Supported Rating Criteria | 2 |
| 2 | Criteria Implementation: Impact on MD Local Government Ratings | 4 |
| 3 | 2017 Sector Outlook | 10 |

New Criteria Brings Changes

- Fitch released its new U.S. Tax-Supported Rating Criteria in April 2016
- Introduction of the Issuer Default Rating (IDR)
- Key Rating Factors (KRFs)
 - Cover both the institutional framework in which an issuer operates and performance within that framework
 - Fitch will publish key rating factor assessments ('aaa' through 'bb')
- Rating outcome does not reflect standard weighting of KRFs
 - Consideration of issuer-specific qualitative and quantitative factors

Rating Through-the-Cycle

- Scenarios address rating tolerance

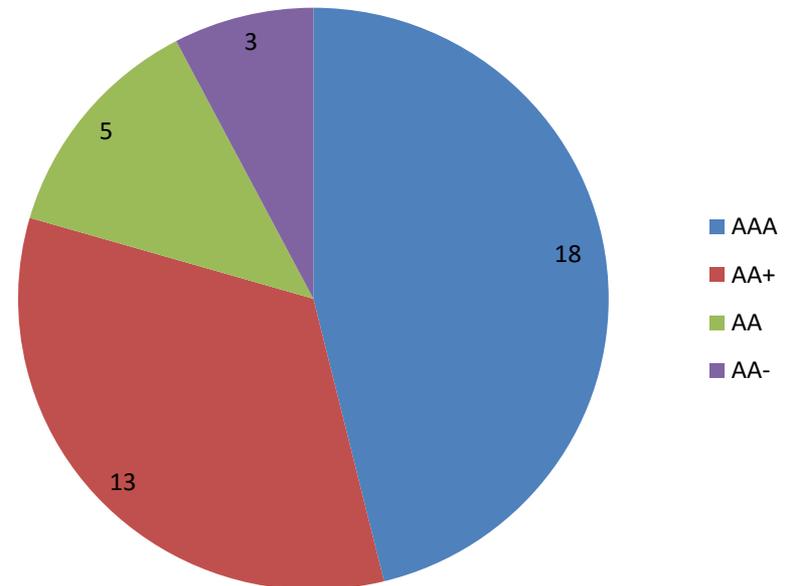

- Considers how a government's revenues may be affected in a cyclical downturn and the options available to address the resulting budget gap
- Conveys the range of performance where a rating would be expected to remain stable
- Recognizes that an issuer's financial position will fluctuate through an economic cycle

Criteria Implementation: MD Local Government Ratings

- 39 city and county issuers reviewed (GO and IDRs)
 - 30 rating affirmations and 9 upgrades
- Rating upgrades largely reflect criteria change
 - More focused consideration of economic factors
 - Sufficiency of economic resources relative to the issuer's risk profile

Fitch MD Local Government IDR Distribution

Maryland Local Governments – Revenue Framework

- KRF assessments – mostly 'aaa'
- Generally strong growth prospects in-line with Fitch's view of the State.
 - Risk factors present, including slowed personal income growth
 - Maryland revenues could be affected by federal spending decisions more than other states. In addition to Medicaid and other national policy questions, Maryland benefits more from direct federal employment, military activity, and federal contracting than other states.
- Economic profile remains strong
 - Industry diversity – service dominated
 - High wealth and skilled labor
- Unlimited ad valorem taxing power – focus on legal authority a key criteria change
- Stable tax base - Zillow Home Prices (May 2017) are up 4.6% y-o-y across the State; 1.9% 1-year forecast

Maryland Local Governments – Expenditure Framework

- KRF assessment of 'aa' for most MD local governments
- Solid flexibility, manageable spending pressures
 - Sound legal control over personnel costs – bargained labor terms but ability to impose cuts
 - Most entities have regained capacity to reduce spending in a downturn without threatening basic service levels
- Debt and retiree benefits consume a reasonable portion of governmental spending
- Education funding
 - MOE provides some constraints
 - Lack of independent ability to reduce spending below MOE

Maryland Local Governments – Long-term Liabilities

- KRF assessment of 'aaa' for the strong majority of MD local governments
- Many comfortably within 'aaa' metric guidance (10% of personal income)
- Key criteria changes
 - Focus on combined debt and pension metric
 - Liabilities expressed as a percentage of personal income not market value
- Conservative debt management practices
- Infrastructure funding concerns
 - For the third year in a row, the National League of Cities' 2016 survey of fiscal conditions cited a lack of infrastructure funding as the leading budgetary concern, above employee salary, pension and healthcare benefits as a source of pressure

Pensions Growing, Few Reporting Surprises

- Pension liabilities rising with lower discount rates, weak investment performance
- Reporting under new GASB standards implemented
 - Increased comparability and information on cost-sharing plans support analysis
 - Reported liability burdens now more volatile given elimination of “asset smoothing”
- Fitch liability adjustment now assumes 6% fixed discount rate (May 2017 criteria update)
 - Low likelihood that pension assets will grow as fast as in past
 - More precise estimate of magnitude of liability

Maryland Local Governments – Operating Framework

- KRF assessment of 'aaa' for 24 of 25 MD local governments rated by Fitch
- The adequacy of an issuer's financial flexibility and reserves is considered in the context of its inherent budget flexibility and the decline in revenue an issuer might experience in an economic downturn
- Superior inherent budget flexibility reflects broad legal control over leading sources of revenue and personnel-related costs, and low fixed-cost burden
- Revenue sensitivity analysis produced via Fitch Analytical Sensitivity Tool (FAST)
- Analytical interpretation – expectations of what an issuer would do in response to a cyclical revenue decline is key to the analysis
- Budget management practices examined for deferral of required spending, risk to outside parties, and timeliness and quality of financial information, among other factors

U.S. Local Government Outlook Stable for 2017

- Core fundamentals remain strong
- The average IDR across U.S. local government portfolio lies between 'AA' and 'AA+' and reflects the following strengths shared by most municipalities
 - The authority to levy property taxes, nonpayment of which can result in property foreclosures
 - Additional taxing power that can include various sales and income taxes
 - The ability to control spending to at least a moderate degree
 - The essentiality of and lack of competition for services provided by local governments
 - Moderate carrying costs relative to spending and long-term liabilities relative to income
- Ratings account for normal cyclical variations
- No expectation for economic cycle of unusual depth or duration or fundamental change in intergovernmental relationships

Fitch Ratings' credit ratings rely on factual information received from issuers and other sources.

Fitch Ratings cannot ensure that all such information will be accurate and complete. Further, ratings are inherently forward-looking, embody assumptions and predictions that by their nature cannot be verified as facts, and can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

The information in this presentation is provided "as is" without any representation or warranty. A Fitch Ratings credit rating is an opinion as to the creditworthiness of a security and does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. A Fitch Ratings report is not a substitute for information provided to investors by the issuer and its agents in connection with a sale of securities.

Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch Ratings. The agency does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security.

ALL FITCH CREDIT RATINGS ARE SUBJECT TO CERTAIN LIMITATIONS AND DISCLAIMERS. PLEASE READ THESE LIMITATIONS AND DISCLAIMERS AND THE TERMS OF USE OF SUCH RATINGS AT WWW.FITCHRATINGS.COM.
